Sample Problems and Detailed Solutions from Chapter 23

Problem 1: Calculating Fringe Width in a Double-Slit Experiment

Question:

A double-slit experiment is set up with a slit separation $(d = 0.1 \text{ mm})$, a wavelength $(\lambda = 600 \text{ nm})$, and the screen is placed $(L = 2 \text{ m})$ away from the slits. Find the fringe width on the screen.

Solution:

Step 1: Convert all units to SI:

- $(d = 0.1 \text{ mm}) = 1 \times 10^{-4} \text{ m}$
- $(\lambda = 600 \text{ nm}) = 6 \times 10^{-7} \text{ m}$

Step 2: Use fringe width formula:

\[

$$\Delta y = \frac{\lambda L}{d}$$

\]

Step 3: Substitute known values:

\[

$$\Delta y = \frac{6 \times 10^{-7} \times 2}{1 \times 10^{-4}} = \frac{1.2 \times 10^{-6}}{1 \times 10^{-4}} = 0.012 \text{ m}$$

\]

Answer:

The fringe width is 12 mm.

Problem 2: Determining the Wavelength of an Electromagnetic Wave

Question:

An electromagnetic wave in vacuum has a frequency of $(5 \times 10^{14} \text{ Hz})$. What is its wavelength?

Solution:

Step 1: Recall the wave speed in vacuum:

\[

$$v = c = 3 \times 10^8 \text{ m/s}$$

\]

Step 2: Use the relation:

\[

$$\lambda = \frac{v}{f}$$

]

Step 3: Substitute:

[

$$\lambda = \frac{3 \times 10^8}{5 \times 10^{14}} = 6 \times 10^{-7} \text{ m}$$

]

Answer:

Wavelength ($\lambda = 600 \text{ nm}$).

Problem 3: Image Formation by a Convex Lens

Question:

An object is placed 30 cm in front of a convex lens with a focal length of 15 cm. Find the position and nature of the image.

Solution:

Step 1: Write the lens formula:

[

$$\frac{1}{f} = \frac{1}{d_o} + \frac{1}{d_i}$$

]

Step 2: Insert known values:

[

$$\frac{1}{15} = \frac{1}{30} + \frac{1}{d_i}$$

]

Step 3: Solve for $(1/d_i)$:

$$\frac{1}{d_i} = \frac{1}{15} - \frac{1}{30} = \frac{2 - 1}{30} = \frac{1}{30}$$

Step 4: Find (d_i) :

$$d_i = 30 \text{ cm}$$

Step 5: Interpret the result:

- The positive image distance indicates a real, inverted image located 30 cm on the opposite side of the lens.

Answer:

The image is real, inverted, and located 30 cm from the lens.
